PROFESSIONAL SUMMARY

Detail-oriented B.Tech Computer Science (AI/ML) student with a strong command of Python, C++, and Data Structures. Experienced in building scalable AI applications, neural network classification, and NLP-driven chatbots. Proven leader as a Google Student Ambassador, dedicated to optimizing software efficiency and solving complex algorithmic challenges.

TECHNICAL SKILLS

- **Programming:** Python (Expert), C++ (Advanced), SQL, JavaScript (ES6+), HTML5/CSS3
- **AI/ML & Data:** Machine Learning, NLP, Scikit-Learn, Pandas, NumPy, Data Preprocessing
- **Developer Ecosystem:** Git, GitHub, Linux/Bash, Google Cloud Platform (GCP), VS Code
- **CS Fundamentals:** Data Structures & Algorithms (DSA), Operating Systems, OOP, DBMS

KEY PROJECTS

- Portfolio Website** | JS, HTML5, CSS3, Responsive Design [Live Link]
 - Architected a high-speed, modern portfolio website optimized for Core Web Vitals and mobile responsiveness.
 - Showcased a portfolio of technical projects, resulting in increased visibility for professional opportunities.
- AI Multi-Turn Chatbot** | Python, NLP, NLTK [GitHub]
 - Developed a context-aware chatbot using Python and NLP techniques for seamless, human-like user interaction.
 - Implemented a modular backend architecture to allow for easy scaling and integration of new intent datasets.
- AI Classification Project** | Python, Scikit-Learn, Pandas [GitHub]
 - Built an end-to-end ML model for data classification, incorporating automated feature selection and normalization.
 - Attained high validation accuracy by implementing k-fold cross-validation and hyperparameter tuning.

PROFESSIONAL EXPERIENCE

- Google Student Ambassador** June 2025 – Present
Community Leadership & Technical Evangelism Remote
 - Spearheading developer initiatives and workshops for 500+ students, focusing on Cloud and GenAI integration.
 - Bridging the gap between academic theory and industry standards by organizing technical bootcamps and hackathons.
 - Elevated community engagement by 40% through strategic outreach and mentorship of junior developers.
- Campus Ambassador – E-Cell IIT Bombay** July 2025 – Dec 2025
Entrepreneurial Outreach & Management Remote
 - Orchestrating large-scale entrepreneurship drives and coordinating regional student engagement for E-Summit.
 - Managing cross-functional communication between institutional stakeholders and student innovator groups.
- C++ Development Intern – CodSoft** June 2024 – Aug 2024
Software Engineering Intern Remote
 - Engineered high-performance C++ solutions for real-world computational problems, focusing on memory management.
 - Leveraged advanced DSA to optimize existing codebases, resulting in a measurable increase in algorithmic efficiency.
 - Conducted rigorous debugging and unit testing to ensure software stability and performance under load.

EDUCATION

- Oriental College of Technology** Oct 2023 – July 2027
Bachelor of Technology in Computer Science (AI & ML) CGPA: 8.39 / 10.0
- Pt. G.A.I.C.** 2021 – 2023
Higher Secondary (Class 12) & Secondary (Class 10) Science Stream

CERTIFICATIONS & LANGUAGES

- **Certifications:** AI Fundamentals (Google), AWS ML Specialty, Cisco Networking, C++ Advanced (Hackerrank)
- **Languages:** Hindi (Native), English (Professional Working Proficiency)
